or Nos. 25 and 27 Fourteenth St MONDAY MORNING, JUNE 27. BUTTER sells at 12½ cents over at Man

tin's Ferry. THE Charleston (Kanawha) Call says that immorality is increasing in that city

to an alarming extent. NAILS are selling freely in Chicago at \$3 for small lots and \$2 90 for car loads, So

says the Times of Saturday. ETERL rails attained their highest price in 1868, (\$158 50 per ton,) and their lowest in 1878, viz: \$42 25. They quote now at

MR. C. B. ABERCOMBIE, of Claysville, Pa. has in his wareroom at the present time 80,000 pounds of wool and 7,000 bushels of

TWENTY ONE business houses and sixty five dwellings are in course of erection up at East Liverpool. So much for the po-

THE New Orleans Picayune is not happy because men who get drunk in bar-rooms expect little boys to go to Sunday-schoo and grow up good.

THE recent census of Ireland shows that the population of that unhappy island has fallen to 5,159,849. The census of 1871 gave Ireland a population of 5,412,377. Thus in the last decade there has been a decrease of 252,528 inhabitants, a reduction of 4 66 per cent,

Wz see it stated that the Pennsylvania Railroad in 1880 carried 16,364,788 tons of freight, or nearly twice as much as the entire ocean traffic in United States vessels Its passenger traffic was equal to a trip of 196,939,640 mlles, or more than twice the distance from the earth to the sun,

THE experiment of lighting the streets of Albany by electricity has so far been successful that the Superintendent of Lamps has been authorized to cut off the gas lamps on the electric-light circuit. One hundred and sixteen gas lamps were accordingly cut off. Twenty-five electric lights are on this circuit.

MR. VENNOR has now begun "predict ing" for July, and under date of June 17 writes: "I regret that I have to warn you of a hot and stormy July, with frequent disastrous storms of wind, hall and rain throughout those sections in which the June storms have been so severely felt The month will resemble that of 1880 rather than that of 1878.

The Wheat Crop.

Very exhaustive crop reports were pub tished in the Chicago Tribune of Saturday from Ohio, Indiana, Illinois, Michigan and Kansas. It seems plain that the crop will not be so large as that of last year but in many localities the grain will be much improved, the heads much larger and longer. There will be less straw bu more wheat. The farmers will obtain good prices for their surplus, and lussmuch as the foreign demand will not be so large as last year, on account of fair crops in Europe, we will have all that may be needed ; for export and plenty for home consumption. Thus the account will be kept about even, and the country will continue to add to its riches and prosperity.

A New York paper specified, a number of large lumber dealers who say that the supply of black walnut is rapidly dimin ishing, and, indeed, practically exhausted in several localities whence it has hitherto been chiefly obtained. No one of these mentioned Kentucky as a past, present, or prospective source of supply. This omis sion lends importance to a statement in the Louisville Courier-Journal of June 15th to the effect that Kentucky abounds in black-walnut timber of excellent quality. The countles which are said to be espe cially rich in this valuable wood are Jack son, Gallatin, Kenton, Boone, Bath, An derson, Shelby, and Greenup. Hitherto in Kentucky an immense number of black-walnut trees have been thoughtless ly destroyed to clear land or cut up into fence rails.

DR. FELIX L. OSWALD says man ought to follow nature and imitate his brother animais in taking a noonday nap, as summer weather comes on. Under a burning sun all vegetation seems to take a rest, and mammalian animals, with no exception. unless it be so insignificant a one as the equirrel, always become semi-necturnal in the summer. Only man, stupid man, tries to make no variation in his regular hours. Dr. Oswald says the noon recesses ought to be lenghtened to at least three hours in hot weather, and children given a chance to take a nap. It certainly is the experience of pupils and teachers, that they are | Cent. O Div... drowsy on summer afternoons, especially W. P. a B. Div ... after they have eaten a hearty dinner. If | Clev. & Pitte you must go to work at one or two o'clock Dr. Oswald says to postpone the hearty meal till night.

A doop antidote to the mining fever who contemplate exchanging a comfortable home for they know not what, in the following paragraph from the San Francusco Bulletin: "There are not less than 2,000 prospectors in the mountains of California at the present time. Most of them have been prospecting for ten or twenty years. They are all poor, With fam are supported to the composition of the co may possibly be found by some persons B. & O. R. B have been prospecting for ten or twenty years. They are all poor. With few exceptions they have been poor and 'hard up' all the time. They do not average 50 cents a day the year round; and no men work harder, or more hours a day. They of clothing. But they toil on month after month and year after year, hopefully and courageously, infatuated and driven forward with the belief that they will 'strike it rich' one of these days, and then they will have a rest and a good time 'down at the Bay' or at the old home 'in the States.''

THE New York papers are growing restive under the Senatorial deadlock now election or adjournment of the Legislature. The seecions of this body entail an expense on the State Tresaury, to be footed by the taxpayers, of \$2,000 a day, which is no small item. It is announced from Albany that Senator Conkling addressed a caucus of his friends Theeday, in which he indirectly advocated an adjournment of the Legislature, while cartioning his friends and followers not to offer the adjournment resolution. The same eventual state of the senator of the same eventual state of the same state of t

ning a conference of forty-five administration men was held, at which a resolution
was unanimously adopted pledging all
present to remain till December 31, if
necessary, in order to elect two thepublicans United States Senators, and also
pledging members in no case ever to vots
for Conkling or Platt or any opponent of
the national administration. This bold
front will be apt to further dispirit the
Conklingites, who, as a last resort, would
doubtless vote with the Democrats for an
early adjournment, trusting their chances
with the Legislature to be elected in the
fall—a desperate chance, indeed, but the
only one which seems now to give Conkling and Platt the slightest hope of a return to the Senate.

St. John's Day at Moundaville. MOUNDAVILLE, June 24, 1881 ditors of the Intelligencer.

Moundayille, June 24, 1881.

Editors of the Instilgaecer.

St. John's Day was celebrated this evaning by the Masonic fraternity of this place. The commodious building was thrown open, and the brathren, with their wives and children, enjoyed themselves until nearly midnight. The young folks occupied the lower hall, where various games were indulged in and enjoyed, while the members with their wives and the older members of the families erjoyed themselves in social intercourse. The supper was served in the commodious hall adjoining the lodge room, and was in keeping with the suppers that the ladies of Moundaville know so well how to serve. Quite a number of toasts were read and responses given. The toast, "Our Invited Guests," was responded to by Judge Melvin in a very happy manner. J. D. Ewing, Eq., also made some pointed and partinent remarks on the same toast. Dr. Fulletton spoke briefly, but to the point, on the toast, "The Masonic Fraternity." Mayor Purdy, E. D. Haines, of Cameron, and others spoke on the same.

The evening was a very enjoyable one, and especially do the Sisters deserve great praise for the boutcous feast prepared. We all hope to enjoy many more such nights. "So mote it be."

Labor Scarce Out West. Washington, June 26.—The expert as ountant of the Treasury who sceom panied Commissioner French on his re cent trip to the Pacific Coast, states the the greatest difficulty is experienced by those who are constructing railroad line in the West in obtaining laborers, and a sufficient number of Chinese cannot be sufficient number of Chinese cannot be tound to meet the pressing demand. On the Atlantic and Pacific Kaliroad Indians are being employed and remunerated at \$2 per day. On the Northern Pacific the extensions of the road is even greater. This company is prepared to build several hundred miles this season, but their operations are retarded by the absence of the requisite number of laborers, and to overcome this an agent is said to have been sent to Chine to arrange for procuring laborers from that country. In view of this sont to Unita to arrange nor procuring haborers from that country. In view of this great demand for laborers, it is singular that efforts have not been made to obtain help from the large cities of the East, is many of which a large number of idle men might be found.

Prejudice Kills.

"Eleven years our daughter suffered on bed of misery under the care of several the best (and some of the worst) physician who gave her disease various names but n relief, and now she is restored to us in goo health by as simple a remedy as Hop litter that we had pooled at for two years, befor using it. We earnestly hope and pray the no one else will let their sick suffer as we did no account of prejudice against so good
